## IT SYSTEM

### Web based Software- AllCloud designed as AutoCloud Solutions

By replacing **Fox Pro** the existing software, the company has launched the new web based software **AllCloud** which provide the better functioning of loan management and integrated with better MIS System.

Basic Features of web based AllCloud Software

- a. Safe and secure Environment
- b. Firewall & Encrypted
- c. Concurrent Back up
- d. No Risk of Hardware Failure and Software Corruption
- e. Automatic upgrades
- f. Disaster Recovery Management
- g. Information Security
- h. MIS-Reporting & Information Availability
- i. Process Driven Solutions
- j. Customer Acquisition
- k. Business Process Management
- l. Integrations platform
- m. Mobility (App Based)

**Maintainance & Back up:** The software is hosted by amazon server which provide the platform for automatic backup and server secured by Antivirus & Internet Security. The company uses dedicated leased lines for uninterrupted internet connectivity. The risk of electric failure is secured by Amazon backup system. All the systems are connected through internet connectivity. The Company has purchased the hosting server of Amazon which takes the backup every night automatically and secure the data of the company.

**Upgradation :** The company understands the need of strong & effective IT system and further upgrading, LOS, LMS & online collection system. The new system has complete functionality for MIS, Taxation Compliances etc.
